

SUPPORT SYSTEM WITH DOUBLE PILE GROUND INSERTION

MU7220

SUPPORT SYSTEM WITH DOUBLE PILE GROUND INSERTION

MU7220

Technical Characteristics

Application	Open Spaces
Orientation	Portrait and Landscape
Angle	25°, 30° & 35°
Foundation	Ground Installation
Lowest distance from ground	50 cm
Installation	PV Piles from hot dipped galvanised steel or aluminium

Our double pole support system is made from primary aluminium alloy. The system is available in 2 orientations, which are 2 portrait and 3 landscape at an angle of 25°, 30°, 35° or any variations thereof. The pole is installed and secured in a concrete foundation or by ground insertion.

We provide static load calculations and installation guides for the construction of each project based on the project's load bearing and location. All the load and static calculations strictly follow the relevant Euro Code specifications. Our systems are designed based on European standards and offer the highest specifications to ensure every project and your investment. All our specially designed solar panel mounting systems are certified by the internationally acclaimed organisation TÜV Rheinland.

Our systems are directly available from our warehouses across Cyprus together with all the necessary accessories for installation.

For large projects we offer profiles upon request. Our R & D department is at your service for any advice or technical support you may require. For large projects we also offer static load calculations upon request.
